Amendments to the Specification:

Please amend the paragraph on page ¹⁶6 in lines 5-9 to read as follows:

On the other hand, c-axis alignment on the (001) plane was evaluated based on the θ -rocking curve (FIG. 5). The Full Width at Half Maximum of peaks was shown to be 3.9° . The (111) pole figure was measured to evaluate the biaxial texture of the deposited layer. The results for a single crystalline base metal are shown in FIG. 6a.

Please amend the paragraph from page 11, line 23 to page 12, line 1 to read as follows:

As shown in FIG. 3, the electroplating process is carried out by dipping an anode 4 and a cathode 1 in a plating solution 2, and growing a metal layer on the cathode 21 using an appropriate power supply.
